WORK EXPERIENCE

■ September 2024 - PRESENT

Ekiria

Full Stack Developer

- I am currently developing Ekiria, an e-commerce platform that integrates product and service sales with a content-rich blog section. My primary focus is on creating an intuitive, user-centered experience while delivering tailor-made technical solutions that meet specific business needs.
- This project involves implementing features such as catalog management, shopping cart functionality, payment gateway integration, and a dynamic blogging system. It also requires close collaboration between design, development, and strategic planning to ensure alignment with the client's vision.
- **Stack:** React, PHP, Sass, Node.js, Axios, HTML.
AWS: RDS, CloudFront, S3 and API Gateway.

■ February 2023 - March 2025

Quinto Impacto IT Consultancy

Full Stack Developer

- I contributed to the development of back-end solutions in Java, focusing on designing efficient, scalable tools aimed at process optimization. I participated in key projects such as Papelería ER, digitizing and automating workflows, and COEF, an innovative application for construction management and inventory control used across Latin America.
- In addition to implementing technical functionalities, I collaborated with multidisciplinary teams to ensure that solutions were aligned with business needs and client requirements.
- **Stack:** Java, Angular, TypeScript, Node.js, CSS, HTML, JavaScript, Sass, Axios, Bootstrap, SpringBoot, PostgreSQL, Vue.js.

SKILLS

- RESTful API Development
- Component-Based Architecture
- Database Management
- Project Management
- Agile Methodologies & Scrum Knowledge
- Sprint Planning & Execution
- Experience with Jira & Trello
- Leadership & Team Motivation
- Teamwork & Collaboration
- Effective Communication
- Critical Thinking & Problem Solving
- Public Relations
- Time Management
